HTML + CSS + JavaScript

HTML → Structure of the Webpage.

CSS → Design of the Webpage.

JavaScript → Interaction.

HTML & CSS Can't respond to the events.

- Mouse Click
- Scroll
- Double Click
- KeyBoard Press.

JS makes the webpage responsive.

	Redeclaration	Reassignment
Var	✓	✓
Let	✗	✓
Const	✗	✗

let a = ——

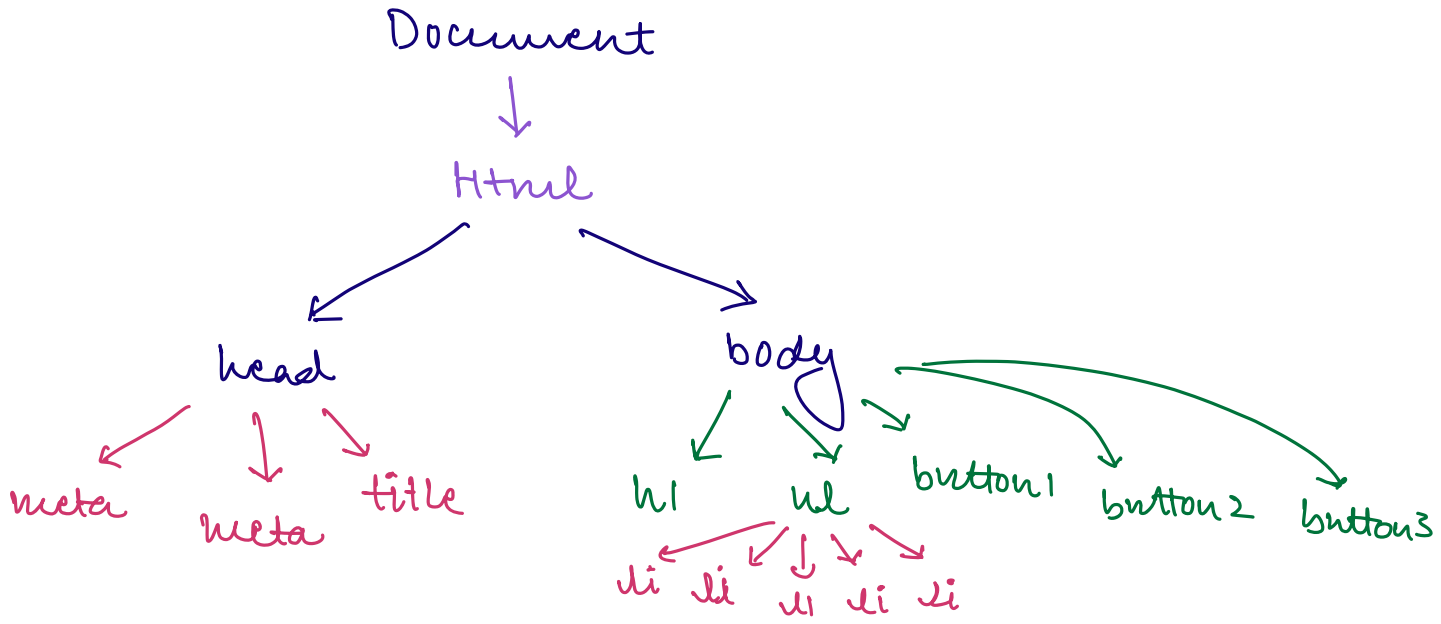
let a = —— ✗ → Redeclaration ✗

a = —— ✓ → Reassignment ✓

DOM

↳ Document Object Model.

⇒ When browser reads the HTML file, it just doesn't display it but it also builds a map of every element of the HTML page. This map is DOM.



⇒ This the DOM of our HTML page

⇒ Tree like hierarchical struct
